Karakalpak State University

Abstract: *The chief editor of "News information-request programs" is the editor-in-chief of the operative news broadcast on the radio. The "News" program is broadcast 9 times a day on the radio channel, and the average time of each program lasts 4-6 minutes. Based on these numbers, if we calculate the number of messages broadcasted on the air during the day, on average, "News" program lasts 50 minutes. In total, the radio channel occupies only 4% of the 24 hours allotted to it. By 2024, if radio broadcasted 7 hours a day, the average news coverage would be 14%. After that, one of the republic's radio channels suddenly began to broadcast all the necessary news and news in a short amount of time.*

Key words: *News, program, operative news, information-request programs, editor, radio channel .*

Today, "Karakalpakstan" radio is increasing the number of informational programs in order to gain a place in the field of information among other media tools, and to deliver reliable messages to as many listeners as possible. In the last years, starting from the year 2024, 9 times per day and 72 times per week will be broadcast. In the radio broadcasts, there is a desire to improve the mechanism of social relations. Radio journalists are monitoring the information in the shortest possible time. This is why the number of informational programs can be broadcast without prejudice.

Today, a total of 17 journalists and reporters will participate in the "News" information-seeking program on "Karakalpakstan" radio. Among them, the regional news reports and the events that are happening in the regions are coming from the regions. The radio broadcasts information in three languages - Karakalpak, Uzbek and Russian. In the news, there are news with comments and reviews, interviews and reports. Then the weather information is broadcasted after the news. An average of 6-7 pieces of information is given when one message is broadcast, and an average of 4-6 pieces of information are given if films are given. Uzbek and Russian news are broadcast twice a day. Apart from that, once a day "Sports news" is broadcasted. In sports news, 8 news are broadcast in 5 minutes due to the fact that there is no weather information. In the sports news, news related to various sports from around the world were read. "News" program was used to broadcast sports news, and it was changed from "Sport News" to exciting sports news. These messages were broadcast at 16:00.

In the main editorial office of "News" information-research programs, journalists and reporters such as G. Jumagalieva, M. Tilepova, R. Berdimuratova, K. Dawletnazarova, Kh. Otegenova, R. Sharapova work. Z.Erzhanova reports in Uzbek language, while Russian reports were prepared by editor G.Kalenderova.

When are the messages in the informative genre? Where? what happened? such questions should be answered. This is one of the main requirements for genres to be included in informational genre groups. In my opinion, most of the reports broadcast on the Karakalpakstan radio did not mention the severity of the incident. For example, let's look at the news broadcast in January 2024. Sometimes, the situation is such that the respondents' opinions about the conducted measures are not given:

The winners of the republican stage of the "Best Business Plan" competition have been determined. The final republican stage of the "Best Business Plan" competition, organized in cooperation with the Liberal Democratic Party of

Uzbekistan and the Center for Support of Entrepreneurship and Farming of Uzbekistan within the framework of the project to support women's and youth entrepreneurship, was held. The events, which have been traditionally held for 2 years, this year also called on all enterprising young people and women to be active. Participants presented their business plans in online and offline formats. The business plan of Nargiza Baribaeva from Bozatov was recognized as the winner in this competition. The most significant business ideas will be financed.

In this news, it is reported that Karakalpakstan won the election held in Uzbekistan. At the end of the news, it would have been possible to summarize the interview with broadcast it on the air. In some reports, films were presented and the opinions of the participants of the event were aired:

"In the higher education schools of our republic, from January 15th to February 15th, an action will be held under the motto "We should not be indifferent to the future of our students". "The goal of the action is to improve the skills of the 9-11th grade students of educational institutions, to mold their life skills," says school psychologist Zernegúl (Film 0.30 seconds). (The message was taken from the "News" program of January 25, 2024). We found out that two respondents had their opinion about the treatment mentioned in this message. The Uzbek-language reports also expressed the opinions of the participants of the event.

"The attention paid to the education of the younger generation at the state policy level in our country indicates how important this area is. Important documents have been adopted on improving the state policy on youth, protecting the rights and interests of young people, and creating conditions for their harmonious adulthood, as set out in the "Strategy of Actions" on five priority areas of the development of the Republic of Uzbekistan. A republican-wide seminar was organized in a one-person school in the city of Nukus, where certain subjects are taught in depth.

The purpose of organizing the seminar was to help students choose the right profession in the future, to teach them the skills and secrets of the teaching profession, and to interest them. We will listen to the comments of the seminar participant Gulijon Ametova. (Film)". (The news was taken from the "News" program of January 25, 2024).

Broadcasting news in the Uzbek language is not a regional issue, but the situation with the entire territory of Uzbekistan is getting worse. For example, let's discuss the news broadcast on February 6, 2024:

“As you know, in April last year, at a meeting dedicated to the reform of the water sector, our President gave an assignment to establish a “Watermen's School”. As part of the implementation of the assignment, the Tashkent delegation of the Ministry of Water Resources and the Institute of Agricultural Mechanization Engineers, the National Research University and a commercial bank jointly established a “Watermen's School”. In this regard, heads and employees of farms were trained in short-term courses. When organizing the school, the experiences of Turkey, Spain and China were studied, and foreign specialists from these countries were involved and training programs were developed.”

In this report, it is not clear when the incident happened. This news is not facts, but general information. It should be noted that this news is related to the events in Uzbekistan, and that's why its urgent comments are important.
