

FINANCING INVESTMENT ACTIVITY

Amirov Temur Mashrab's son – assistant of
Samarkand economy and service institute.

Abstract: *In this article, it is planned to develop problems, discussions and conclusions regarding the study of the sources and methods of development of financing of investment activities in our national economy according to their specific characteristics.*

Key words: *investment, investor, investment activities, financing, investment projects, sources of financing, stock markets, real investments, financial investments.*

Investment activity financing means separated funds known one investment of the project needs for of use exactly purposeful essence is understood. Activity financing mainly financial to assets no, maybe real to assets investments attraction doer investment projects financing for is used.

In particular, the new of the kind products and new technological processes work exit and to master directed innovative activity of financing the most important method as service does.

In the country large infrastructure projects to do increase, modern high technological work to release objects building verb for the purpose of the economy fast development, abroad people investments active attraction to do about wide large-scale works to do is being increased .

This with together , this in the field of activity efficiency , the most first of all , there is from resources unreasonable use , investment to the program included of projects economic in terms of to the goal compatibility and profitability superficial studied with related row shortcomings negative impact showing .

Various economic "investment" in the literature the concept of "activity". to the content various definitions given them deep and wide research meat past without , investment activity to the content given following to the definitions separately stopped to pass necessary .

Economist scientist Neshitai's according to "Investment activity is income to take and useful to the fruit to achieve for the purpose of funds placement (investment) and practical movements to do increase "It is a collection " definition given [1].

L. L. Igonina as well as investment activity net in content also understanding possible tell passes . To him according to : " investment activity or differently as as you say private investment activity (investment) itself investment resources to the investments rotation process as expression " will do " explains [2].

in our republic local and foreign investment resources deep again working and high additional for the price owner competitor products work excretory high technological and localizable modern enterprises organization to do for local and foreign investments active attraction verb , free economic of the regions certain to the field specialization support and investment activities in them financing to develop ground creates . In Uzbekistan economic growth of provision main factor investments to the territories of the Republic included investments analysis is covered.

Investment projects financing sources and methods in development following from suggestions use financing adjective provision and their successful to do in progress important importance profession gives :

In the regions new organization being pushed in allocating land to enterprises irrigated lands when selected considered destruction amount one time payment instead of organization being pushed enterprise to the charter local authority share as proportional of formation legal criteria work exit In this case, the state private partnership about in law stated 51% state share organization being pushed

entrepreneurship subject with negotiations through to the investment amount proportional shaping mechanism work exit

From abroad purchase done technologies take of transport-logistics services on arrival competitive price not being , air in transport cargo and passenger in transportation – the world in the market fuel and energy resources of value down going current transport and logistics services under conditions of companies put an end to the monopoly and between them competition to the surface to bring to the goal It is appropriate .

Investment infrastructure enough underdevelopment - 5-7% rate of banks saved in case only large to projects not , medium , small businesses and consumption credits briefcases shaping it is necessary Also investment funds , insurance and leasing companies activity also encouragement and investment projects to do in progress their participation effective on the road to put

Islam finance instruments to the standards according to export- import , project and syndicated in funding , valuable the papers in production Islamic banking asset practices on the road to put and for entrepreneurs Islam finance instruments about propaganda and agitation their work take to go necessary .

In the snow seeing passed tasks possibility fate faster and effective own the solution find , not only , investment activities financing sources value in the evaluation , but of the state socio-economic development the situation and of the population prosperous life type further to improve service does .
